[Project Context](#)

Create a responsive navbar component with a logo, navigation links, and a mobile menu.

Planning Phase

Transparency

I'll create a responsive navbar component. Here's my plan:

1. Create a navbar.tsx component with desktop and mobile layouts
2. Implement a logo component that links to the homepage
3. Add navigation links with active state styling
4. Create a hamburger menu for mobile view
5. Add animations for the mobile menu
